

SPIDER CLAMP- PISC SERIES

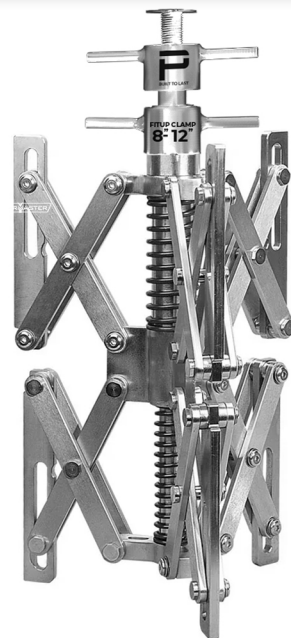

Spider Clamp- PISC Series

Spider clamps are designed for precise internal pipe alignment during welding preparation. These tools ensure accurate pipe positioning and consistent fit-up before tack welding, helping to prevent edge misalignment and improving weld quality.

Used in pipeline construction, fabrication shops and industrial installations, spider clamps provide a reliable solution for aligning pipes from the inside while maintaining optimal access for welding operations. Their robust design and simple handling allow fast.

Features

- Full weld access with no external obstructions around the joint.
- Useable for all pipe materials.
- 5 Clamps for pipe sizes ranging from 2" - 32".
- Dual expanding clamps for precise internal alignment.
- Independent adjustment for differing pipe diameters.
- Fast and easy to use on pipe/elbow to flange joints.

Technical Specification

Item Code	Flange Size Range	Weight
PISC-0204	2-4"	2.8 kg
PISC-0408	4-8"	12.0 kg
PISC-0614	6-14"	20.0 kg
PISC-0820	8-20"	27.0 kg
PISC-1632	16-32"	36.00 kg
