

## LUBE-A-TUBE

For expander rolling tube ends into tube sheets.

**Application :** Apply directly to the inside of the tube ends by hand.

**Removal :** Any excess of Lube-A-Tube is removed by wiping or the residue will be completely removed during hydrotest / boil-out operations.

### *Features :*

- Being a soft, paste lubricant, Tube-A-Tube is easy to apply and “stays put” in the tube prior to the actual rolling operation - it will not run like oil.
- No chance of entering between the tube sheet and tube end OD.
- Will not carbonize under the heat and pressure encountered during the tube rolling operation.
- Lube-A-Tube is its own indicator serving to show the operator what tubes are still to be expanded, eliminating the possibility of missed tubes.
- Lube-A-Tube keeps the expanding tool cool and prolongs tool life.
- Equally effective for rolling condenser tubes, boiler tubes and heavy wall cracking still tubes in refining equipment.
- Lube-A-Tube is available in 1000ml and 5000ml plastic buckets / pails.
